Secondary Medical School in Trnava, Slovakia

Erasmus+ 

We are Secondary Medical School that prepares students for work in medical facilities.

Our school came into existence in 1952 and since then it has been providing education and training to more than 500 students every year. The

school employs about 50 professional teachers specialised in their majors.

**Our school provides education
in different fields of study.**

“I think that being a laboratory technician is very interesting work and you really can not get tired of it, because human body is unpredictable so you never know what to expect when you are diagnosing its samples and that is why many students choose this study.”

—u s

How long is the study? How is the study finished?

- The study is 4 years long
- It is finished with school leaving exam called maturita. It consists of theoretical and practical exams from specialised subjects and exams from Slovak and English

What specialised subjects do we have?

Our specialised subjects are...

- Anatomy – *science about human body*
- Latin
- Pathology – *science about diseases*
- Histology – *human tissues*
- Microbiology – *science about microorganism*
- First aid
- Hematology and Transfusiology – *science about blood and blood diseases and blood transfusion*
- Biochemistry – *science about chemicals and chemical processes in human body*

Erasmus+

Where do we have practice?

- I can continue my studies at university as a laboratory technician

Erasmus+

Masseur

Erasmus+

Erasmus+

Massage is the study of
anatomy in braille.

– Jack Meagher

Why did I choose this field of study ?

- Everybody in our class wanted to help people and make their lives easier and healthier
- We wanted to learn more about the human body
- It is always a good feeling to massage and help people

Erasmus+

How long is the study? How is the study finished?

- The study is 4 years long
- We leave school with exam called maturita. It consists of theoretical and practical exams from specialised subjects and exams from Slovak and English

Erasmus+

What specialised subjects do we have? Where do we have practice?

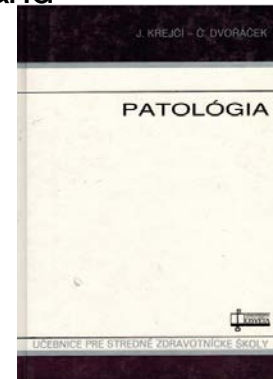

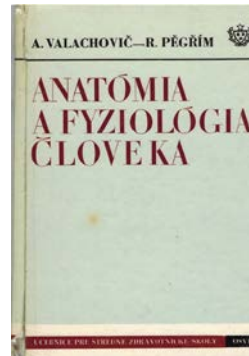

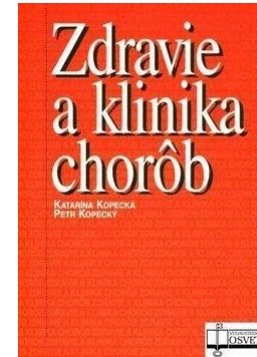

Physical therapy – the theory of all massages

Anatomy – everything about human body

The health and diseases clinic – study about diseases

Pathology – study about causes of diseases

We have our practice in hospitals, rehabilitation facilities and in school.

Job description of masseurs and skills/abilities/ physical demands for masseur

They help clients with pain, stress and physical ailments by massaging and kneading muscles and soft tissues, advise clients on relaxation techniques to help prevent muscle problems and relieve stress, study a client's physical history, prepare and apply oils to the client's skin

A masseur must understand how the body's muscles interact with one another and know how to treat specific body parts. A masseur works on a one-on-one basis with clients, so interpersonal skills and professionalism are essential. Many masseurs are self-employed and need to understand money management and have business skills.

Erasmus+

Places for masseurs in our school

Erasmus+

My professional future after graduation

- I can find a job in hospitals or in rehabilitation facilities
 - I can continue a postgraduate study
 - I can go to university or college
- I can start working in my own massage parlor
 - I can start working in sport clubs

Erasmus+

Erasmus+

„The progressive world is necessarily divided into two classes —those who take the best of what there is and enjoy it —those who wish for something better and try to create it.“

—Florence Nightingale

Why did I choose this field of study?

- I chose this field of study because I want to help people and give them hope that even they are mortally ill, they still have the right to live, even if they have to live with some restrictions during their life
- I like working with people

How long is the study?

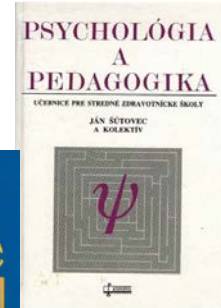

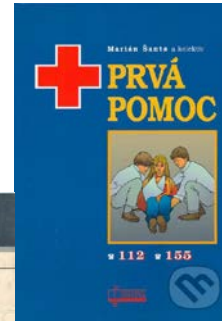

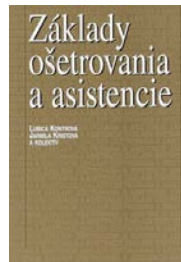

How is the study finished?

- It is a four-year study
- It is finished with school leaving exam called maturita. It consists of theoretical and practical exams from specialised subjects and exams from Slovak and English.
